

To the GAE Committee: Written testimony in opposition to SB 184 and HB 5262

When the books have been written, and the movies made on the 2022 COVID-19 “pandemic,” we will know that it was all a sham, designed for the purpose of benefitting Big Pharma, the elites, and the Leftists’ desired election results.

Yes, there were many deaths from COVID-19, but a huge reason for those deaths was the unwillingness of hospitals, doctors, and the MSM to be honest about the very effective and inexpensive drugs such as Hydroxychloroquine (HCQ) and Ivermectin. Dr. Vladimir Zelenko and others have seen remarkable success in treating COVID-19 with those drugs, yet those drugs were denied to patients who desperately needed them, resulting in huge numbers of unnecessary deaths.

Leftists of all stripes yearn for another unfair electoral advantage like that of 2020. Even if conditions were similar to 2020 (many sick and hospitalized), our tried and true voting procedures must not be altered again. The changes implemented in 2020 produced a staggering array of electoral deceptions (ballot harvesting, double voting, the vote count being stopped for hours in swing states, boxes of ballots dragged out from under tables, and so much more) which resulted in the stealing of our elections.

If Democrats can’t win without cheating, they need to change what they stand for. We don’t need these changes, and we can ill afford them. Vote “NO” on both these bills.

Sincerely,

Jane Bate
